SOUND CARDS

## **Sound Games:**

1. Have the children close their eyes (we use the following chant to do listening exercises/games:

"Close your eyes and open your ears,

Listen carefully...see what SOUNDS you can HEAR!"

2. Play the sounds from the White Noise App one at a time. See if the children know WHAT is making the sound or WHERE the sound is being made.

3. Print, laminate, and cut apart the sound cards in this file. Show the children the cards and then play the sounds again. Choose a child to pick out the card that MATCHES the sound being made (this activity can be done in small groups, too.)

4. The children can also draw one sound card. Play the sounds for the children and have the child with the matching sound card HOLD UP that card.

The app also has a paid upgrade for additional sounds.
